

THE
HOTEL
DIRECTORY

We **realize** that
there are so **many** places
to **see** and so many
activities to do, in so little time.

That's why
we focus on **you**

Dear guests,

We hope you are well and planning your summer getaways after the very different spring we experienced.

In the summer of 2020, Blue Dolphin is ready to welcome you for a carefree and safe vacation.

Blue Dolphin, from the very beginning, started arrangements and staff training, so that we are ready for the moment we would have the green light from the state and the tourist market to operate!

Sars-Covid-19 health standards follow and are constantly adapted to protocols applied by the World Health Organization and the Ministry of Health which aim to the safety of all guests and employees.

We co-operate with scientists in the field of food and water safety, hygiene and infection prevention, monitor developments and implement preventive measures so that we can ensure the health and safety of our visitors and partners.

We have developed new improved disinfection techniques, including nebulizer machines to reach all surfaces.

In public places, we have added to the existing, new strict cleaning and disinfection measures with increased frequency using appropriate cleaners and disinfectants.

For your own protection against the risk of COVID-19 transmission, we use signage to maintain social distance in our already reorganized space.

Hand disinfection stations will be located in various parts of the hotel as well as at each entrance.

We provide our employees with masks and gloves where needed.

Food hygiene and safety is ensured by the proper training of food handlers in safe food preparation and presentation.

The food safety standard we apply is certified by an independent control foundation.

In addition, we have designed new, safer approaches to buffet and dinner presentation to prevent COVID-19 transmission.

Daily temperature measurement of our employees serving buffet, dilution of tables, umbrellas and seats in all common areas, latest technology disinfectants are a few of the necessary, but pleasant changes that await you at your favorite destination in Halkidiki.

Blue Dolphin, having the manufacturing advantage of large and scattered spaces throughout, is in itself a safe haven.

We look forward to you joining us.

Please find below the detailed measures and actions we follow for the safety of all of us!

With our warmest wishes

for health and strength

The Blue Dolphin Hotel Resort Team.

Please read this carefully.
It will only take five minutes of your time.

In case of fire

Safety instructions

Upon arrival, please be sure to locate the emergency exit that is nearest to your room. There is relevant labeling, at the door of your room and at the hotel corridors.

Fire warning

If any smoke or fire comes to your attention, please activate the warning signal at the hotel corridors or inform the Reception. If there is a warning tone, this means that there is smoke or a possible fire break out. If the fire warning signal continues for more than two minutes, this means that the building should be evacuated immediately.

Evacuation procedures

Before evacuating your room please check if the door is hot. If it is hot, place a wet towel over the door handle before attempting to turn it.

It is important to turn your face away from the door before opening it, in order to ensure that you can leave your room safely.

Please close the door after you leave your room, as this will prevent the fire from spreading into the interior of your room.

Do not take anything with you! Your personal safety is much more important than your personal belongings.

Bend down low or crawl alongside the corridor in order to avoid the smoke. Follow the indications towards the nearest emergency exit.

When you reach the emergency exit, walk down the stairs slowly.

The meeting point is the entrance of the hotel. When you arrive there, wait for the instructions of the hotel's staff or the Fire Department.

In your room

In case there is dense smoke or fire in the corridor outside of your room, it is safer to remain in your room.

Place wet towels and sheets under the door of your room, so that smoke cannot enter easily.

If there is smoke in your room, open the door of the balcony and breathe with the use of a wet towel.

Try to let us know of your situation by contacting the Reception. The hotel staff and the firemen will be able to rescue you.

Avoid smoking in your room.

Do not use inappropriate or incompatible electrical appliances.
